EDUCATION

- **RCC Institute of Information Technology (RCCIIT)** Kolkata, WB, India
Bachelor in Technology (Computer Science and Engineering); CGPA: 8.78 July 2021 - June 2025

SKILLS SUMMARY

- **Languages:** JavaScript, HTML5, CSS3, C, C++, Python
- **Libraries and Frameworks:** ReactJS, Redux, ExpressJS, NodeJS, Django, Tailwind, Bootstrap
- **Tools and Platforms:** VS Code, Replit, Netlify, Vercel, Git, Firebase, Postman
- **Database:** MongoDB

PROJECTS

- **Note-Write Web Application** React.js, Tailwind CSS, MongoDB, Node.js, Express.js, JWT
Complete Frontend, Backend and Database Infrastructure
 - note-taking web application where users can create and manage their accounts and take organized notes with individual titles.
 - The user authentication system ensures security through **JWT encryption and passwords are hashed for protection**.
 - The application offers CRUD functionalities for note management, allowing users to add, edit, and delete notes effortlessly.
 - **Links:** [Deployed Link](#), [GitHub Repository \(Frontend\)](#), [GitHub Repository \(Backend\)](#). (2023)
- **stockXplore Web Application** React.js, Tailwind CSS, Django, Django Rest Framework
Complete Backend, ML Model integration, and Frontend
 - stock price prediction web-app, which leverages a sophisticated ML model to forecast the stock price for the next 30 days.
 - The backend system hosts the machine learning model and provides a RESTful API. Users on the client-site can input a stock symbol, triggering a request to the backend API, which in turn returns the predicted stock prices.
 - The application enhances user understanding by visualizing these predictions through a graph.
 - This integration creates a seamless experience, combining powerful predictive analytics with an intuitive user interface for informed decision-making in stock investments.
 - **Links:** [GitHub Repository \(Frontend\)](#), [GitHub Repository \(Backend\)](#). (2023)
- **Innovision Website** React.js, Tailwind CSS, Firebase
Developing and maintaining of Frontend and Backend
 - Innovision website streamlines event registration for RCCIIT's departmental fest of CSE Department.
 - It provides real-time updates, secure user authentication, and an intuitive interface for easy exploration and registration.
 - **Links:** [Deployed Link](#), [GitHub Repository](#). (2023)
- **Deliveroo Clone App - Frontend** Expo, React native, Native Wind (Tailwind CSS), Redux
Complete Frontend
 - A Deliveroo-inspired food delivery app featured with four main screens.
 - A dynamic homepage showcasing various food categories, a detailed category screen allowing users to explore and add items to their basket, a basket screen for order review and management using **Redux Toolkit for state management**, and an order placement screen with real-time tracking of both user and delivery personnel locations.
 - **Links:** [Demo Video](#), [GitHub Repository](#). (2023)
- **Rotaract Club of RCCIIT Website** React.js, Bootstrap, CSS3
Complete Frontend
 - Rotaract Club of RCCIIT Website is featured with a Home Page for a basic introduction and motto of the club, a Team page to feature team members of different cells of the club, an Event page to feature past and upcoming events of the club with photos and corresponding links and a login and signup page for club members.
